

Observation 0: 3. Organic Allowance

Dream Culture | Peer Pressure

Absence

Solution

Ideas

In order to combat the pressure from peers in this form of stampeding understanding, absense can be administered to give room to grow. Taken out of the flock and put into a stable, Organic, environment, the individual can then have the freedom to grow and recover in the way that they need to.

Possibilities

Forel and Siri can organically allow to pass others with stampeding behaviours, while the trampled is passed over. This will give room for them to release from their cages as time allows from the pressuring sense of neglect from the stampeeders, in the level of intensity they are needing to understand and comprehend the dangers they are causing.
