Collection 6: Organic Direction

Desires

Presence:	Amount:
Present	High

Explanation

I desire to do quite a lot of different things to continue my Organic Preservation work. I'm able to do some things here and there but it does seem that everyone is extremely Ill and Unable to support me in a Realistic way, they prefer to Hide all of the Supportive things they do, including their plain, simple, Presence.

Actions

Presence:	Amount:
Present	Medium

Explanation

I broke some glass while cleaning the shower drain and stepped on a piece, which made me Bleed and Tore my Skin on the Bottom of my Left Foot. I have been doing more work to Fix some of my Wardrobe items and then also Learning to Collage on my Mannequin for different reasons and ideas, for types of Fabric Reuse. I have been attempting to Take Care of Flaria, but he is very Diminished from Extreme amounts of Systemic Work, becoming nearly completely Systemised in Rotaric types of Chopping Movements in his Organic Experience. He won't come out of his Invisible Cloak and it's keeping me looking Strange in my Actions. I Don't Intrude to Force his Presence to be Real, unless it becomes a Danger, so I have been Acting in a way that is Sensitive to the Possibility but helping him grow his Sense of Presence for Himself to Gain the Ability, then.

Endeavors

Presence:	Amount:
Present	Very High

Explanation

Most of my recent Endeavors have been Inclusive in Organic Preservation for Life itself, Not only my Own life. It has changed the way that I work quite a bit and it has Proven to be more Benefitial for me. Flaria is a Big Part of this, coming from me, and the Elohiym have now told him that he will Need to be Helped by Me in order to get Better, otherwise he will be Stuck in Hospice. This is the Level of Care that I have Administered to him, since then, a week ago, about. He is Learning in very Difficult Ways, but is now seeming to become more Restful. I am Adamantly Taking Steps to help him know how to Re-enter into "The World" as a commoner, here.
