Collection 7: Organic Creation	
Originality	
Presence:	Amount:
Present	High
Explanation	
Very original area, most of the originality is dated for some large amount of time though. I will say that while the structures remain from long ago, wells for example, the sand storm activity has changed their purposes and architecture.	
Completion	
Presence:	Amount:
Present	Medium
Explanation	
Homes and landscaping are all complete. Home projects get complete. Everything is neat and well kept in the area. There isn't much looking left unfinished apart from some buried historical areas. Ancient Remains have been left unburied. Efforts for community connection are also falling short.	
Application	
Presence:	Amount:
Present	Low
Explanation	
Not much application for things making a big impact other than bird feeders and wildlife care zones.	
Procreation	
Presence:	Amount:
Present	Low
Explanation	
Not a huge variety of wildlife families, but they are successfully procreating and growing. Things are getting better in the human community in this area, slowly, as well.
