### Dream Culture | Peer Pressure

#### Category

##### Research

Peer Pressure is like a herd pushing a child out of place in formation and trampling them as a consequence. The meaning may not have been to harm them, but it has. When someone is not allowed to release from this type of pressure, they are pulled underwater like from a wave, too strong to overcome in their state of weakness.

##### Knowledge

When Peer Pressure is applied, people begin to break out of themselves. They collapse out as a result of frustration and decay from suppression. This removes growth possibility, devolving individuals into previous generations of suppression. This form of oppression diminishes the mentality needed to freely grow how needed.
