

Collection 0

Collection 1: Organic Time

Clock Usage

Presence:	Amount:
Present	Low

Explanation

The wildlife isn't using clocks, but the resource keepers are (including residents).

Clock Reliance

Presence:	Amount:
Present	High

Explanation

Most of the wildlife is getting food and fresh water based on a clock schedule. Sounds, like airplanes, car dangers, and service trucks are also keeping some on this reliance. Boats are on a clock schedule, effecting the locals. Feeding schedules for indoor animals also exist, as well as humans. Humans that are on a work schedule are also having clock reliance in their lives.
