Collection 9: Organic Life

Miracles

Presence:

Amount:

Present

High

Explanation

Needed quite often. Angels can be witnessed almost everywhere in the entire area. Miracles like saving lives at sea also occur, Sam for instance. Yet to see what is to occur with the Windsor family needing access to the area.

State of Living

Presence:

Amount:

Present

Instable

Explanation

The area is living, not in danger of anything too massive, mostly needing gradual rehabilitation. Needing understanding developed of where Organic Preservation is in context of saving life as compared to Medical Care or Need. Also needing dilineation on how they are different. Needing more organic resource allocation so that Forest can get the resources she needs to allocate because she is the only one with that ability. Needing a stable sense of existence in the area for those responsible enough for those people's resource allocation and with the ability to provide it to its full extent. Needing privacy and authority to provide the full amount of relief to those needing it, needing to stay within level 5 systemisation. Forest is needing her own home. Excessive frequencies are making Covid burn more than normal, lowering rest and sleep abilities in those more sensitive to frequencies and their mates.
