Collection 4: Organic Rate

Expansion

Presence:	Amount:
Present	Low

Explanation

Construction and roads have made this low. Storms also lessen this area. Not many over weight either, seems to be more under weight in the wild. People using cars often tend to struggle with weight gain, especially on meat diets, from lack of movement. Tough because no public transport and canopy gets short by road from ancient stampede event.

Maturity

Presence:	Amount:
Present	Medium

Explanation

Starvation and stampede have made the area younger.

Evolution

Presence:	Amount:
Present	High

Explanation

High from 3ft sand storm layer over top soil. Metal rested garbage cans in the middle of the forest from 70s sunken into the ground from sand storm layer.
