

Collection 0

Collection 5: Organic Growth

Dimension

Presence: Amount:

Present Small

Explanation

I'm small in size and have been able to maintain that dimension for my body. I'm not growing too far out of my dimension, but I have been struggling with some form of insemination that has been making my body grow thicker than it normally is. I have also been detoxing some semen and milk from the injuries that happened to the Hiemel from outside of Boem that sprayed on us at that time and are still in their recovery process, he is currently bed ridden.

Advancement

Presence: Amount:

Present Great

Explanation

I have been advancing greatly! I learned who my real parents are and then I also have been able to retire fully. I'm really happy about this and I see that I am advancing in my relationship with Flaria as well. I did learn he is currently in slavery such as that of Sodom & Gomorrah, being an angel man. I'm attentive to see what the Hiere change and how I can help, but I do now need to be able to financially support him, so I'm finishing Boem so that I can get his resources so that he can be here, for our wedding and everything.

Achievement

Presence: Amount:

Present High

Explanation

I was able to speak to the System that is in charge of the Hiemel's lower body recovery today. He needs to grow back his fin, so I supported their effort of using a Growth System of some kind to help them learn Organic Preservation. I walked them through all of the steps and structure today. They need to see it bigger and more of it, so we will be growing it out from here.
