Collection 1: Organic Time

Clock Usage

Presence: Amount:

Present Low

Explanation

I do not use my clock to look at very often unless I am needing to look at the time to know if it is time to give the cats food or to check spreading out when I have a cigarette until the afternoon. I also check the time if I wake up in the night and am deciding if I want to stay awake or if I want to go back to sleep.

Clock Reliance

Presence: Amount:

Present Low

Explanation

I do not rely on a clock but to spread out when I have a cigarette or to check to see if Karen is soon to return from work so that I can get a cigarette from her. I wake up on my own in the morning without an alarm. I prefer to use sunlight.
